Education

Sep 2025 – Jul 2027 **MSc Human-Computer Interaction and Design (HCID)** *EIT Digital Master School*
Double-degree programme, minor in Innovation & Entrepreneurship
Aug 2026 – Jul 2027 **KTH Royal Institute of Technology**, Stockholm *(exit year, current)*
Sep 2025 – Jul 2026 **University of Twente**, Enschede *(entry year, completed)*

Sep 2019 – May 2023 **BSc Computer Games Development, Computer Science** *Limerick*
University of Limerick

Employment History

Apr 2025 – Sep 2025 **Full-stack Developer, IBM** *Cork*

- Supported IBM API Connect, IBM's API management platform, resolving customer-reported integration issues across Node.js, React, NGINX, PostgreSQL, OpenAPI, OAuth2 and GraphQL.
- Handled the integration of webMethods into API Connect following IBM's acquisition, working within Kubernetes, Red Hat OpenShift, Helm and Jenkins deployments.

Feb 2024 – Apr 2025 **Software Developer, General Motors** *Limerick*

- Maintained and improved production systems in COBOL, JCL, REXX, EasyTrieve and PL/I.
- Contributed to mainframe modernization projects, working in Azure DevOps and Git.

Jan 2022 – Aug 2022 **Software Engineer, Ericsson** *Athlone*

- Set up and maintained microservices on Ubuntu/Linux in an agile team, using Git, Gerrit and Docker/Kubernetes, and picked up JavaScript on the job.

Sep 2020 – Jun 2021 **Teaching Assistant, University of Limerick** *Limerick*

- Led peer-supported learning groups for 1st-year Java Programming students, and taught web design, Java and Processing at UL Cybercamps.

Skills

Languages: Java, JavaScript, Python, C#, C/C++, Go, Lua, HTML/CSS, SQL, MATLAB, COBOL, JCL, REXX, EasyTrieve, PL/I

Technologies: Git, Docker, Kubernetes, Linux, Azure DevOps, Jenkins, PostgreSQL, Supabase, Node.js, React, OpenAPI, OAuth2, GraphQL, OpenShift, Helm, Unity, Simulink, Qt, Figma, REAPER, Claude Code / AI-assisted development

Research & methods: Mixed-methods user research; quantitative analysis (ANOVA, regression, cluster and conjoint analysis, A/B testing); usability evaluation; Research through Design; physical prototyping; startup business modelling, market sizing and commercialisation strategy

Projects

StuddyBuddy, an AI-native academic planner. Founded through Novel-T's Entrepreneurial Experience at the University of Twente, pitched to investors and carried on past the programme; validated across 17 interviews and 3 observational studies, built on React and Supabase.

Vigil, EIT Digital Summer School venture. Two-week venture building intensive at the Polytechnic University of Bari, pitching a SaaS platform that turns mandatory EU Digital Product Passport compliance from pure cost into revenue.

Softy, interactive installation (KTH). A jellyfish in a box that calms down when you turn your phone over, built with a project team using Arduino, servos, an air pump and 3D printing.

Human-centred design research project, workplace lactation rooms. Ran interviews and thematic analysis through ideation, prototyping and evaluation into a final design.

2D procedural map generator, BSc thesis. Unity tool in C# generating layered terrain from Perlin noise, cellular automata and flood fill, grounded in a 10,000-word research paper.

Accomplishments

- Recipient of a full scholarship for the EIT Digital Master School
- A1 result for BSc thesis
- President's Volunteer Award Covid 19 for the Academic Year 2020/2021
- Recognition of Excellent Quality Credit Average, Spring 2022/23 and Spring 2019/20
